Economic Modelling

Index to Volume 8

January, April, July, October 1991

Articles – titles

AMOS: a macro–micro model of Scotland. *Frank Harrigan, Peter G. McGregor, Neil Dourmashkin, Roger Perman, Kim Swales and Ya Ping Yin*, 8.4, 424–479

Control, coordination and conflict on international commodity markets. *M. van Groenendaal and A. de Zeeuw*, 8.1, 90–101

The Danish growth model CLEO and the stability of the economy. *N. Kaergård*. 8.2, 175–186

A distributed lag model for quarterly disaggregation of the annual personal disposable income of the Greek economy. *Dikaios E. Tserkezos*. 8.4, 528–536

Dynamic responses to policy and exogenous shocks in an empirical developing country model with rational expectations. *P. Montiel and N. U. Haque*. 8.2, 201–218

Estimating portfolio models from financial flow data: an analysis of the demand for liabilities, real assets and financial assets by the household sector. *G. C. Lim*. 8.2, 219–224

Growth and equity effects of changing demographic structures in the Netherlands: simulations within a social accounting matrix. *S. I. Cohen and J. M. C. Tuyl*. 8.1, 3–15

Household and education projections by means of a microsimulation model. *J. H. M. Nelissen*. 8.4, 480–511

Imperfect asset substitution in a two-country model. *M. Artis and S. Gazioglu*. 8.1, 34–44

Inflation model of a semicommand economy. *Davorin Kračun*. 8.4, 512–527

Integrated real financial modelling: a macroeconometric application for the Dutch economy. *E. Sterken*. 8.2, 130–174

Large econometric models of an East European economy: a critique of the methodology. *W. W. Charemza*. 8.1, 45–62

Macroeconomic modelling and the policy of restraint in the Netherlands. *F. A. G. den Butter*. 8.1, 16–33

Market imperfections in a general equilibrium framework: an empirical analysis. *P. Capros, P. Karadeloglou and G. Mentzas*. 8.1, 116–128

Market structure implications of instability in the world coffee market. *J. K. Sengupta and E. C. Wang*. 8.1, 102–115

Model building for a planned system. *L. R. Klein*. 8.4, 418–423

Non-parametric tests of the efficacy of money stock control strategies. *D. W. Mitchell and P. J. Speaker*. 8.1, 83–89

Oxford Economic Forecasting's system of models. *Mark Burridge, Shamik Dhar, David Mayes, Geoffrey Meen, Edwina Neal, Nick Tyrell and John Walker*. 8.3, 227–414

Real wages in a multisectoral model of the Norwegian economy. *Ø. Eitrheim and R. Nymoen*. 8.1, 63–82

A small macroeconometric model with direct government intervention on the demand and supply side: the Canadian experience in the 1970s and 1980s. *G. T. Papanikos*. 8.2, 187–200

The specification, estimation and simulation of a small global macroeconomic model. *James R. Malley, David Bell and John Foster*. 8.4, 546–559

Trade prices and supply in the UK economy. *Elias Dinenis and Sean Holly*. 8.4, 537–545
